# I. MINIMUM WAGE RATES

This section contains particulars of weighted average minimum weekly and hourly wage rates for adult males and adult females for Australia and each State, together with index numbers with base : year 1954 = 100.

2. The minimum wage is the lowest rate payable for a particular occupation, and for most occupations it comprises the basic wage (see page 12) and "secondary" wage payments, i.e. additional amounts such as margins for skill, etc., and loadings of various kinds. In the majority of cases such rates are prescribed in awards or determinations of Commonwealth or State industrial authorities or in agreements registered with them. Some rates are prescribed in unregistered agreements between employers and employees.

3. The Minimum Wage Rate Index is based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April, 1954, which showed the number of employees covered by individual awards, determinations and agreements, and provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November, 1954. This second survey showed the number of employees in each occupation within selected awards, etc., in the various industries, thereby providing occupation weights.

4. The minimum wage rates used in the index are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and agreements in force at the end of each period commencing with March, 1939, for adult males and March, 1951, for adult females. The index for adult males includes rates for 3,424 award designations. However, as some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,322. For adult females the corresponding numbers are 1,103 and 518. By use of the industry and occupation weights derived from the surveys described above, these rates were combined to give weighted averages for each industry group for each State and Australia. Because of coverage difficulties the rural industry is not included in the index.

5. Because the indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries", those awards, etc. which relate solely or mainly to salary-earners are excluded.

6. In ascertaining from awards, etc., the wage rates for representative occupations, it was found in some cases that an occupation selected as representative in the base year (1954) did not exist in earlier years. In such cases another occupation with the same marginal rate of wage was chosen from the same award and variations in the wage rates for this occupation were taken to be representative for the earlier period.

7. Since 1954 the industrial structure in Australia, and particularly in some States, has been undergoing a degree of change which over a period is likely to have some effects on the index. Generally the effect of new or expanding industries on the index is not significant, because occupations in such industries can usually be covered by existing awards, and the wage rates for the new occupations conform very closely to those for existing occupations. Occasionally, however, an entirely new award is made to cover a new industry, and in such cases occupations from the new award are introduced into the index whenever such action is warranted by the number of employees in the industry. By these means it has been possible for the occupations in the index to be kept, as nearly as may be, continuously representative and for a high degree of comparability to be preserved over a long period.

8. Weighted averages of the components of the total minimum weekly wage rate, i.e. basic wage, margin and loading, are calculated separately for adult male employees covered by Commonwealth awards, etc., and for those covered by State awards, etc.

These particulars are published in Tables 3 and 4 of this bulletin. Relevant definitions are as follows:-

"Commonwealth awards, etc." include awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator.

"State Awards, etc." include awards or determinations of, or agreements registered with, State industrial tribunals, together with certain unregistered agreements, where these are dominant in the particular industries to which they refer.

"Basic wage" rates are weighted averages of the weekly rates prescribed in awards, etc., for the occupations included in the index for each State. For industries other than mining, metropolitan basic wage rates have generally been used. However, there are a number of occupations for which basic wage rates other than the metropolitan rate are prescribed. Also in some States at various times, State Government employees under Commonwealth awards have been paid State basic wage rates, and the basic wage rates of some employees have been subject to automatic quarterly adjustments while those of other employees within the same jurisdiction have remained unchanged. In all such cases the basic wage rate actually paid is used in tables herein. For these and other reasons, the weighted average basic wage rates shown in the tables in this section differ, in the majority of cases, from the metropolitan basic wage rates shown in Tables 11 and 12 of Section II.

"Margins" are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work such as skill, experience, arduousness or other like factors.

"Loadings" include industry loadings and other general loadings prescribed in awards, etc. for the occupations included in the index. Loadings, etc. that are not applicable to all workers in a specified award occupation (for example, those payable because of length of service; working in wet, dirty or confined places; excess fares incurred due to location of building site) are not included in the minimum wage rate index.

9. The proportion of employees covered by Commonwealth and State awards, etc., varies considerably as between States. In addition, the proportions of employees engaged in the respective industries differ from State to State. As a result there are relatively wide differences between the weighted average amounts of margins and loadings in the several States.

10. The wage rates shown in the tables in this section should not be regarded as actual current averages, but as indexes expressed in money terms, indicative of trends. Neither the wage rates nor the corresponding index numbers measure the relative level of minimum wages as between States.

11. Minimum weekly wage rates for adult males should not be compared with average weekly earnings per employed male unit, shown in Section III, because the latter include not only the earnings of adult wage-earners but also those of all salaried employees, junior wage-earners and part-time and casual employees.

12. Wage rates and index numbers for adult males are available as at the end of each quarter from March, 1939 to December, 1956 and as at the end of each month from January, 1957. Particulars for adult females are compiled quarterly and are available from March, 1951. For details of wage rates and index numbers from 1939 reference should be made to the following Statistical Bulletins:-

S.B. 123 - Minimum Weekly Wage Rates, 1939 to 1959.

S.B. 31 - Minimum Wage Rates, January, 1960 to June, 1963.

Figures subsequent to June, 1963 will be found in the monthly bulletins, Wage Rates and Earnings, commencing with the June, 1964 issue.

13. In some cases, when awards, etc. are varied, the new wage rates are made retrospective. Also there is generally an unavoidable, and sometimes considerable, delay in the receipt of notification of changes in margins and loadings in respect of the occupations included in the index. Such retrospective, etc. effects on figures already published for recent months are generally incorporated in revisions made at the time of publication of detailed special Statistical Bulletins (see paragraph 12).

TABLE 5. - MINIMUM HOURLY WAGE RATES : ADULT MALES (a)

INDUSTRY GROUPS, 30TH APRIL, 1965

Weighted average minimum hourly rates payable and index numbers of hourly rates.

Industry Group	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	Aust.
RATES OF WAGE (Pence)							
Mining and Quarrying (b)	159.28	117.62	148.66	115.20	129.92	121.20	147.05
Manufacturing -							
Engineering, Metals, Vehicles, etc.	116.70	116.25	123.19	116.48	117.58	121.13	117.22
Textiles, Clothing and Footwear	114.73	114.00	115.23	110.20	114.69	111.62	114.11
Food, Drink and Tobacco	117.13	121.33	120.88	112.78	117.64	115.82	118.85
Sawmilling, Furniture, etc.	118.05	113.68	112.96	114.25	113.67	114.43	115.12
Paper, Printing, etc.	125.54	127.99	130.34	124.50	136.90	119.27	126.77
Other Manufacturing	118.00	116.19	116.75	115.88	114.39	116.94	116.87
All Manufacturing Groups	117.46	117.16	120.38	115.94	117.04	117.90	117.53
Building and Construction	121.61	126.53	118.88	118.24	117.27	120.28	121.59
Railway Services	118.71	109.56	125.23	112.70	112.23	116.63	117.12
Road and Air Transport	122.92	117.42	111.32	113.90	117.28	117.10	118.56
Communication	137.56	136.12	135.43	137.02	135.90	135.77	136.64
Wholesale and Retail Trade	119.55	119.45	121.59	115.75	117.59	120.85	119.34
Public Authority (n.e.i.) and Community and Business Services	123.81	120.77	119.30	115.70	115.19	128.06	120.75
Amusement, Hotels, Personal Service, etc.	116.01	110.65	112.87	109.73	112.43	113.56	113.16
All Industry Groups (c)	121.33	118.79	122.14	116.49	118.13	119.59	120.02

## INDEX NUMBERS

(Base : Weighted Average Hourly Wage Rate, Australia, 1954 = 100)

Mining and Quarrying (b)	187.6	138.5	175.1	135.7	153.0	142.8	173.2
Manufacturing -							
Engineering, Metals, Vehicles, etc.	137.5	136.9	145.1	137.2	138.5	142.7	138.1
Textiles, Clothing and Footwear	135.1	134.3	135.7	129.8	135.1	131.5	134.4
Food, Drink and Tobacco	138.0	142.9	142.4	132.8	138.6	136.4	140.0
Sawmilling, Furniture, etc.	139.0	133.9	133.0	134.6	133.9	134.8	135.6
Paper, Printing, etc.	147.9	150.8	153.5	146.6	161.3	140.5	149.3
Other Manufacturing	139.0	136.9	137.5	136.5	134.7	137.7	137.7
All Manufacturing Groups	138.4	138.0	141.8	136.6	137.9	138.9	138.4
Building and Construction	143.2	149.0	140.0	139.3	138.1	141.7	143.2
Railway Services	139.8	129.0	147.5	132.7	132.2	137.4	137.9
Road and Air Transport	144.8	138.3	131.1	134.2	138.1	137.9	139.6
Communication	162.0	160.3	159.5	161.4	160.1	159.9	160.9
Wholesale and Retail Trade	140.8	140.7	143.2	136.3	138.5	142.3	140.6
Public Authority (n.e.i.) and Community and Business Services	145.8	142.3	140.5	136.3	135.7	150.8	142.2
Amusement, Hotels, Personal Service, etc.	136.6	130.3	132.9	129.2	132.4	133.8	133.3
All Industry Groups (c)	142.9	139.9	143.9	137.2	139.1	140.9	141.4

(a) See paragraph 10, page 4. (b) For mining, the wage rates include lead bonuses, etc.

(c) Excludes rural, and shipping and stevedoring. The former is not included in the Minimum Wage Rate Index and for the latter definite particulars for the computation of hourly wage rates are not available.

TABLE 6. - MINIMUM HOURLY WAGE RATES : ADULT MALES, ALL GROUPS (a)

Weighted average minimum hourly rates payable and index numbers of hourly rates.

## II. BASIC WAGE RATES

Basic wage rates are determined by Commonwealth or State industrial authorities. The basic wage is that part of the minimum wage to which are added margins for skill, etc. and loadings. It is determined without regard to any circumstance pertaining to the occupation or industry of an employee.

For further information reference should be made to the Labour Report, in which the history of basic wage fixation in Australia is dealt with at some length. For tables showing Commonwealth and State basic wage rates over a long period of years see the Appendix to Labour Report No. 50, 1962 and 1963.

### COMMONWEALTH BASIC WAGES

The Commonwealth Conciliation and Arbitration Commission may, for the purpose of preventing or settling an industrial dispute extending beyond the limits of any State, make an order or award altering the basic wage or the principles upon which it is computed. In practice, the Commission holds general basic wage inquiries from time to time and its findings apply to industrial awards within its jurisdiction. Since December, 1950 the basic wage for adult females has been 75 per cent. of the adult male rate.

(a) Rates are operative from the beginning of the first pay-period commencing in the month shown or commencing on or after the date shown. (b) Automatic quarterly adjustment in accordance with variations in retail price index numbers discontinued.

(c) Rates declared subsequent to an inquiry.

## STATE BASIC WAGES

In New South Wales automatic quarterly adjustments to the basic wage were discontinued following legislation passed in October, 1964 and Commonwealth basic wage rates were adopted retrospective to 19th June, 1964. State basic wages are not declared in Victoria and Tasmania, but Wages Boards, which determine minimum rates to be paid in various industry groups or callings, now generally adopt Commonwealth rates. In Queensland the industrial authority may declare a basic wage only after an inquiry. In South Australia the rates have been the same as Commonwealth rates since 1950. The industrial authority in Western Australia determines the basic wage each quarter after considering retail price index numbers. In all States, since May, 1961 the basic wage for adult females has been 75 per cent. of the adult male rate. The rates for the capital cities in each State are shown in Table 12.

### III. AVERAGE WEEKLY EARNINGS

The figures in this section are derived from particulars of employment and of wages and salaries recorded on Pay-roll Tax returns, from other direct collections and from estimates of the unrecorded balance. Pay of members of the defence forces is not included.

Particulars of wages and salaries paid are not available for males and females separately from the sources mentioned above; average weekly earnings have therefore been calculated in terms of male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it was not possible to estimate the ratio of male to female earnings in the several States the same ratio has been used in each State. Because the actual ratio may vary between States precise comparisons between average earnings in different States cannot be made on the basis of the figures shown.

For a number of reasons average weekly earnings per employed male unit cannot be compared with the minimum weekly wage rates shown in Tables 1 - 4. The figures in Tables 1 - 4 are weighted average minimum (award) rates payable to adult male wage earners in non-rural industry for a full week's work, at the end of each month or year. Those in Table 13 represent actual average weekly earnings for all wage earners and salaried employees (whether adult or junior, full-time or part-time, casual, etc.) and are quarterly or annual averages.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. See explanatory notes above. (b) Includes the Australian Capital Territory. (c) Includes the Northern Territory.

**NOTE:-** Quarterly figures are affected by seasonal influences. Comparisons as to trend are generally best made by relating complete years or corresponding periods of incomplete years. However, from December quarter, 1963, comparisons with corresponding quarters of earlier years are affected by additional prepayments arising from extensions of annual leave from two to three weeks. Seasonally adjusted indexes of average earnings are shown in Table 14.

(a) See explanatory notes on previous page. (b) Average earnings per employed male unit. Based on Pay-roll Tax returns and other data. (c) The index for manufacturing industries for the years 1954-55 to 1963-64 is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual Factory Censuses. The figures from September quarter, 1964 are interim estimates based on Payroll Tax returns and are subject to revision when the Factory Census for 1964-65 is tabulated.

NOTE:- The index numbers for "All Industries" and "Manufacturing" show the movement in average earnings for each group over a period of time. However, they do not give, at any point of time, a comparison of actual earnings in the two groups.

#### IV. SURVEYS OF WEEKLY EARNINGS AND HOURS

General. Sample surveys in respect of most private employers subject to pay-roll tax (i.e. those paying more than £200 per week in wages and salaries) have been conducted as at the last pay-period in October for the years 1962, 1963 and 1964.

Results of the 1964 survey with some comparisons with the 1962 and 1963 surveys are contained herein. The figures shown in this bulletin for the 1963 survey show some revisions to those first published in the July, 1964 issue of the Wage Rates and Earnings bulletin.

Figures for average weekly earnings, average weekly hours paid for, and average hourly earnings as at the selected pay-periods are presented for males and females (adult and junior) separately by industry groups and by States. They reflect the effects of differences (and of changes between points of time) in amounts paid for the various occupations; in amounts paid for the same occupations; in occupational structures within industries; in industry structure; in degrees of business activity (incidence of overtime, etc.); and in the incidence of incentive schemes, piece-work and profit-sharing scheme payments, etc.

Where an establishment was closed down for part or whole of the last pay-period in October, or operations were seriously curtailed by an industrial dispute, breakdown, fire, etc., the employer was asked to supply particulars of wages and hours for the nearest normal pay-period. However, in the circumstances of the industrial dispute in the mining industry in Queensland in 1964, actual figures for the specified pay-period were used.

Coverage. The results of the surveys are based on returns from stratified random samples of private employers subject to pay-roll tax. Employees in rural industry and in private domestic service are excluded because most employers in these two industries are not subject to pay-roll tax. Also excluded from the surveys are employees of government and semi-government authorities as well as those of religious, benevolent and other similar organizations exempt from pay-roll tax. The earnings and hours of waterside workers employed on a casual basis are excluded because they are subject to wide fluctuations for short periods such as those covered by these surveys.

Approximately 3,550 employers were included in the October, 1964 survey and the sample represented 1,359,000 male and 568,200 female wage and salary earners.

The figures contained in the tables in this section are for "Employees (other than part-time) Whose Hours of Work Were Known" as defined below. Because of the heterogeneity of the data and the high sampling variability in some areas, figures relating to other employees (part-time workers, executives etc., and those whose hours of work were not known) are not available for publication.

Comparability of Results. Since the survey estimates are based on a sample they are subject to sampling variability, that is, variations which might occur by chance because only a sample of employers was surveyed. In addition to affecting the results of each sample such aspects also affect comparison between each year's results.

A detailed comparison of the results of the October, 1962 survey with the other two surveys is not presented mainly because there was a change in industry classification after the 1962 survey. A broad comparison by States is shown in Table 19.

Definitions. The following definitions refer to terms used in the surveys and in the tables in this section.

"Employees" refer to male and female employees on the pay-roll of the last pay-period in October.

"Employees Whose Hours of Work Were Known" exclude (i) all managerial, executive, professional and higher supervisory staff, whether or not their hours of work are known, and (ii) any other employees whose hours of work are not known. They comprise all other employees who receive pay for the last pay-period in October and whose hours of work were known (including foremen, transport supervisors, floor-walkers, other minor supervisory employees, clerical and office staff, etc.).

"Part-time Employees" refer to employees who ordinarily work less than 30 hours a week. Employees on short-time who normally work 30 hours or more a week are classified as "other than part-time".

"Adults" include employees who, although under 21 years of age, are paid at the adult rate for their occupation.

"Juniors" are those employees under 21 years of age who are not paid at the adult rate for their occupation.

"Earnings" (i.e. gross earnings, before taxation and other deductions) include ordinary time and overtime earnings, payments for sick leave and holidays, commission, and all other payments such as incentive scheme, piecework and profit-sharing scheme payments, etc., and bonus payments of any kind. Annual or other periodical bonuses are included only at the appropriate proportion for one week. For employees paid other than weekly, only the proportion of earnings equivalent to one week is included.

"Weekly Hours Paid For" include ordinary time and overtime hours, paid stand-by or reporting time, paid sick leave and paid holidays. For employees paid other than weekly, hours are converted to the equivalent for one week.
